About us

MDS Medical Ltd are a family run business committed to providing an exceptional and professional level of service to all of our customers.

We work closely with each practice to identify the individual needs and requirements to ensure the correct equipment is supplied. In addition to autoclaves, we can offer a range of high quality products such as RO systems, compressors, ultrasonic baths and more.

MDS Medical provide:

- Servicing
- Repairs
- Maintenance
- Pressure Vessel Inspections
- Written scheme of examination for safety devices
- Calibration certification for all makes of autoclaves
- On-site training sessions and informative talks
- Full validation of dental autoclaves

With a nationwide team of dedicated and qualified service engineers, we aim to meet the service requirements of our customers quickly and efficiently.

In most circumstances we can complete repairs on-site. Should further investigations need to be carried out at our workshop a loan service may be available.

We provide a consistently high standard of customer service and advice and pride ourselves on building long-standing relationships with our clients.

All Autoclaves are fully compliant with MDD 93/42/EEC, BS EN13060 small sterilisers, HTM 01-05 pressure equipment directive 97/23/EC “SEP”. Prices exclude VAT

Available in 3 Litre, 6 Litre, 9 Litre & 13 Litre capacity. Ultrasonic cleaning uses ultra sonic waves induced by a high frequency transducer to agitate a liquid. The agitation produces high forces on contaminants adhering to instruments.

Features

- Normal and soft power control
- Degas function
- Adjustable time setting
- Adjustable temperature control
- User-friendly, clear panel controls
- Memory function
- Digital display
- High performance transducer

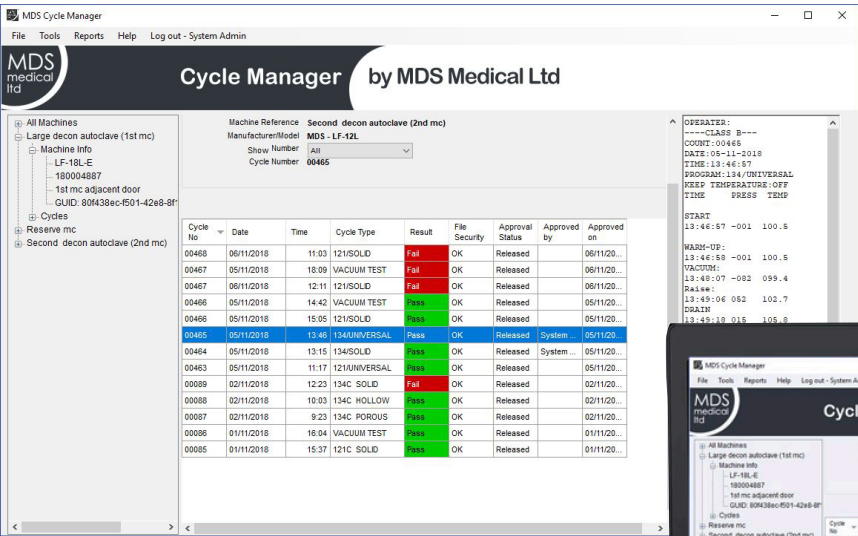

Technical Infomation

Capacity	Ultrasonic Power:	Unit Size (L x W x H):	Internal Size (L x W x H):	Price

13 Litres	300W	360 x 330 x 310mm	330 x 300 x 150mm	£395.00 + VAT

Further infomation:

Ultrasonic cleaners with digital timer, heater, degas, double powers and memory features. The 6, 9 & 13 Litre Ultrasonics are fitted with a drainage tap.

Features

- Our high capacity cycle management system automatically logs cycles and clearly states pass or fail for clarity
- Print out cycle reports for your records or store them in PDF format
- Shows all relevant information about the autoclave and the cycle
- Cycle summary reports can be printed or stored on the computer in PDF Format
- Simply view cycle reports for a specified date range

£250 + VAT

The MDS Reverse Osmosis system is the most economical method of purifying tap water. Conveniently fitted underneath your sink unit and producing up to 8 litres of stored water at one time, which is then readily available on tap as standard – larger systems available on request.

No electricity required hence minimal running costs. This unit is used for the autofill function of our MDS Medical autoclaves. Eliminating the need for manual filling.

Features

- Produces up to 8L of water at one time
- User friendly
- Usually fitted under sink unit
- Fittings included
- Can be used in conjunction with the automatic fill function

Specification

- No electrical power needed
- 16L tank

Further information:

RO water can be used for Autoclaves, Ultra Sonic cleaners, Washer Disinfectors and washing all instruments

£495.00 + VAT

The automatic fill function is specifically designed for MDS Medical Autoclaves in conjunction with the MDS RO System.

This is an additional option on any of our autoclaves. Autofill removes the need for manual filling of the autoclave hence saving the practice staff time and eliminating the risk of human error.

This function works by the RO system automatically filling the clean water reservoir in the autoclave with the correct amount of water required for each cycle and then automatically draining the waste water from the waste water tank.

Features

- Can be added to any existing autoclave or at time of purchase
- Reduces risk of human error
- Ease of use
- Ergonomically friendly

Price on Application

MDS can provide the complete stainless steel anaesthetic system which includes an on-board 5 litre oxygen concentrator, a high accuracy flowmeter, emergency O2 flush, compatibility block and Tec 3 vaporiser.

We can also provide the above excluding the vaporiser and / or oxygen concentrator.

The anaesthetic unit works in conjunction with a small oxygen cylinder (not supplied by MDS) housed on the rear of the frame. In case of power failure, a manual valve is supplied to switch over to the back up oxygen cylinder.

Features

- Easy cylinder change
- High accuracy rotameter 10 l/min - O2
- Emergency O2 flush
- Stainless Steel Frame - Mounted on 75mm Castors
- Compatibility block accommodates the vaporiser
- Handy equipment drawer with removable stainless steel tray for ease of use

Technical Infomation
